VIIIth Spanish Congress of Biogeography

September 23rd – 26th 2014, University of Seville, Spain

The University of Seville hosts the VIIIth Spanish Congress of Biogeography with the theme Vegetation and Fauna Systems in Littoral Environments: Progress in Characteristics, Dynamics and Criteria for its Conservancy. Given the traditional participation of Ibero-American researchers specialized in tropical studies, the programme includes a session specifically on Ibero-American tropical environments.

The scientific programme is currently being developed and contains five core areas: 1) Littoral environments, 2) Ibero-American environments, 3) Applied Biogeography, 4) Fauna, 5) Structural and Dynamic Biogeography

- Alternate distribution of Q&A and poster sessions according to the five core topics (23rd-24th and 26th September)
- A plenary symposium reviewing the evolution of Biogeography and its forthcoming future from a geographical perspective (26th September)

- Fieldtrips and excursions (on 25th and 27th September) are also being considered, including 1) Doñana Natural Space - littoral environment, 2) Sierra Morena – northern part of the provinces of Seville and Cordoba

Registrations of IBS members are welcome until **July 15** (considered equal to AGE and CSIC memberships), without any penalty. Check <http://congreso.us.es/viiiiceb/en/index.html> for details. Spanish is the official language of the congress, and there will not be a translation service. Nevertheless, oral and poster communications will be allowed in other languages such as English, French and Portuguese.

Download the Congress Scientific Programme from <http://congreso.us.es/viiiiceb/en/programme.html> and the Congress Poster from <http://congreso.us.es/viiiiceb/en/congress-poster.html>

If you want to announce a meeting, event or job offer that could be of interest for (some) biogeographers, or you want to make a call for manuscripts or talks, please contact us at ibs@mncn.csic.es and frontiersofbiogeography@gmail.com.
