Agriculture and Ecosystems

The University of California Merced is seeking one or two faculty members (open rank) levels in ecological sciences, environmental, mechanical, or sustainability engineering, or environmental health related fields focused on sustainable agricultural systems. These positions are part of UC Merced's ongoing interdisciplinary cluster hires in this area. The successful candidate(s) will have a record of accomplishment related to food availability, security, and stability, or innovative technologies to improve sustainable agricultural systems. Potential research areas include but are not limited to nutrient systems and cycling, agrobiodiversity, pests and diseases, precision agriculture, food processing, water reuse, and waste commoditization. Full details are available at: <https://aprecruit.ucmerced.edu/apply/JPF00383>
